DD/R # 533-62

6 September 1962

MEMORANDUM FOR: Deputy Director of Central Intelligence

SUBJECT: ELINT Coverage of Cuba

25X1A

1. [REDACTED] representing the JRC, will present at today's Special Group Meeting information on additional flights for coverage of the Cuban electronic build-up. It is understood that B-47 and F3D aircraft are being flown today.

2. These aircraft will provide a very useful additional coverage but it seems that still further effort is warranted. Two aircraft in particular are available which could provide excellent coverage. These are: the Navy's WV (Constellation) aircraft and SAC's U-2 equipped with System IV. Both of these collection systems provide [REDACTED] and while on peripheral missions should give high probability of intercept of surface to air missile related signals.
